true and still true.

small bit of clarification on our previous conversation: the tent went up at the end of November 2011 or 12 and never came down throughout the month of December. The actual construction on the doorway and other components started the following January 2012 or 13. (The years are blending together it has been so long!) Previously I believe I said construction started in December which was not accurate. They had holiday events all through December and never took the tent down. After the events they left it up to build "under cover" in January.

Subject: your further assistance...

Hey Keith,

Please confirm that this is indeed true:

As evidenced by an email, dated April 16, 2014, from Keith Miller Scott's has failed to install the moveable "Public Shore" signs alongside the public tables and chairs.

Thanks,

Adrienne
